

VRC's Wide Area Cold Spray Nozzle

Part# NZZL0086 & NZZL0091

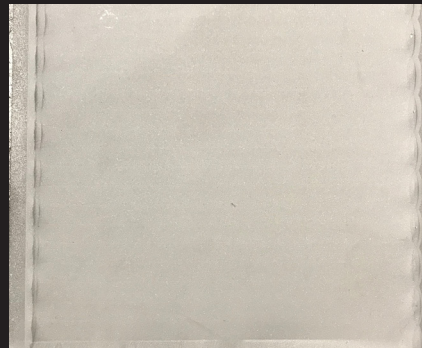

Features

- Increase spray width by approximately 3X
- Enable larger step size without increased waviness
- Increase feed rates without increasing thickness per pass

Combining the increased plume width, with increasing step size, and higher feed rates enables more rapid coverage of large surfaces.

Approximately 3X increase in spot size

Example of 4mm step size spraying of VRC Alumicorr
